

RAHUL KOLARKAR

DATA ANALYST

Melbourne, VIC | +61-481777207 | rahul.kolarkar@yahoo.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Data Analyst with around 5 years of experience delivering customer analytics, periodic reporting, dashboarding and business insights across not-for-profit healthcare, consumer research, financial services, and health and fitness domains. Strong proficiency in SQL, Python and data visualisation, with hands-on experience analysing datasets containing more than 10 million records, creating analysis-ready tables in BigQuery and exporting outputs to Google Cloud Storage. Experienced in KPI reporting, customer segmentation, lifetime-value and retention analysis, data validation and reporting automation. Skilled at investigating data-quality issues, translating complex findings into clear recommendations and managing expectations across technical and non-technical stakeholders.

TECHNICAL SKILLS

Data Analysis & Programming: SQL, Python, R, PySpark, pandas, NumPy, exploratory data analysis

Reporting & Visualisation: Tableau, Power BI, Looker, Excel, KPI reporting, dashboard development

Business & Customer Analytics: Segmentation, lifetime value, retention, campaign attribution, ROI, trend and market basket analysis

Cloud & Data Platforms: GCP BigQuery, Google Cloud Storage (GCS), Snowflake, Databricks, MySQL

Data Quality & Delivery: Data validation, reconciliation, anomaly investigation, reporting automation, dbt, Git

Statistics & Predictive Analytics: Statistical inference, A/B testing, classification, regression, clustering, gradient boosting

AWS Knowledge: Amazon S3, SageMaker AI, Lambda and AWS AI services

Collaboration: Stakeholder management, requirements gathering, insight presentation, Agile delivery, Jira

PROFESSIONAL EXPERIENCE

MERKLE INSPIRE PVT. LTD.

Senior Data Analyst - Customer Insights | May 2021 - January 2024

- Led customer and campaign analytics for 3 US based not-for-profit healthcare clients, translating fundraising, direct-mail and patient-program data into acquisition, retention and campaign recommendations that informed \$10M to \$12M annual fundraising decisions.
- Developed repeatable weekly and biweekly reporting workflows on a data model built around a 10 million+ row transaction fact table joined with mailing, campaign and donor dimension tables, maintaining timely and accurate delivery of campaign insights.
- Leveraged SQL in BigQuery to create 3 to 5 analysis ready tables per week in response to ad hoc JIRA requests, exporting outputs to Google Cloud Storage for downstream analysis, reporting and file sharing.
- Created and maintained a suite of Tableau/Power BI dashboards, reducing manual reporting time by approximately 83%, covering ROI, retention, acquisition costs and donor lifetime value, including a monthly campaign report, a quarterly lifetime value dashboard and a Sankey chart visualising donor segment transition.
- Migrated 7 to 8 ongoing analytical processes from Base SAS to Python, reconciling results to within 99.8% accuracy against existing outputs and eliminating dependency on SAS licensing while maintaining business continuity.
- Performed data audits, validation checks and anomaly investigations across source data, transformation logic and reporting outputs, uncovering root causes of persistent discrepancies and improving stakeholder confidence in reported figures.
- Applied segmentation, propensity modelling and lifetime value analysis to identify high value donor groups representing \$10,000 in lifetime value, providing actionable customer insights.
- Built classification and regression models using Python and SQL to support campaign targeting, contributing to a 28% improvement in donor engagement.

- Analysed performance trends and donor behaviour to surface improvement opportunities and translate findings into practical business recommendations.
- Partnered with client and internal stakeholders to define reporting requirements and success measures, manage expectations, communicate progress and present insights in business-focused language.

MINDBODY INDIA

Business Intelligence Analyst 1 | April 2021 - May 2021

- Analysed customer behaviour and product-usage data using Databricks, Snowflake, dbt and Looker to reveal engagement patterns and operational trends.
- Facilitated cloud-based transformation and reporting workflows, investigating inconsistencies between source data, transformed tables and business outputs.
- Developed Looker reports for stakeholders and used Git-based workflows to manage analytics code changes and improve reporting consistency.

BRANDSCAPES WORLDWIDE

Executive Data Analyst | June 2019 - February 2021

- Delivered analytics across grocery, rewards, market-research and consumer-behaviour datasets to support commercial decision-making.
- Conducted market basket and TURF analysis to identify product associations, purchasing patterns and combinations capable of reaching the largest customer segments.
- Developed a KPI based analytics bot in Python that eliminated manual effort spent scrolling through monthly performance decks for business heads across 30+ countries, enabling self-serve, chart-based answers to routine business questions.
- Applied Google Vision API to extract and analyse text from images and translated quantitative findings into practical stakeholder recommendations.

EDUCATION

DEAKIN UNIVERSITY | Melbourne, Australia

Master of Data Science (Professional) | March 2024 - November 2025

Specialization: Artificial Intelligence and Computer Vision

- Completed applied analytics projects involving data cleaning, exploratory analysis, customer segmentation, feature engineering and predictive modelling using Python.
- Compared model performance using MAE, RMSE, R^2 , precision, recall and F1-score, and communicated findings through visualisations, reports and interactive interfaces.

SAVITRIBAI PHULE PUNE UNIVERSITY | Pune, India

Bachelor of Engineering | July 2013 - June 2018

- Designed and analysed air heater configurations using ANSYS CFD and ICEM CFD to study airflow, heat transfer and velocity behaviour.
- Competed in Formula Student India and SAE INDIA SUPRA 2016, gaining exposure to collaborative engineering design, technical documentation and competition-based project delivery.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- AWS Certified AI Practitioner | July 2023 - July 2029
- Post Graduate Program in Data Analytics, Imarticus Learning | August 2018 - June 2019

ADDITIONAL INFORMATION

Melbourne-based | Australian Temporary Graduate Visa (Subclass 485) with full working rights
